Cliente

Juan Pablo y David, los propietarios de la tienda, tuvieron que reinventarse tras la crisis y decidieron montar una tienda de zapatillas, un hobby que les apasionaba.

Objective

Crear un concepto store, es decir, una tienda con una propuesta de valor única, concreta y diferente que solucione a su vez un reto de almacenamiento: guardar 750 cajas en un local de 27m2.

Concept

Hacer del problema la solución.
El mecanismo es como una noria que mantiene este pequeño espacio de 27 m² diáfano y permite almacenar 750 pares entre suelo y techo.
Píñones, cadenas y guías conforman una estructura similar a una pequeña atracción de feria. El problema de almacenamiento convertido en la identidad del espacio.
Un software de arduino conectado al mecanismo controla el storage con una aplicación que permite vivir una experiencia de compra única, virtual y física.
